ANUJ DUBEY

+91-9979002667 | *anujd1595*@gmail.com | LinkedIn | GitHub

EDUCATION

- **Sant Longowal Institute Of Engineering and Technology, Punjab India** BE (Computer Science and Engineering),2021

Coursework: Data Structure, Web Design, Analysis of Algorithms, Operating System, DBMS, Cyber Network, Cyber Security

WORK EXPERIENCE

Co-Founder and CTO, SharpCode (MERN Stack) | 2.5k+ Followers on LinkedIn **JANUARY 2024 - Present**

As the Co-Founder and CTO of Sharpcode, I single-handedly developed an entire website using the MERN stack, managing both frontend and backend aspects. The project was successfully completed and hosted, providing me with invaluable experience in error handling, web hosting, API integration and many more. This journey has significantly enhanced my technical skills and understanding of full-stack development.

Intern at MNIT JAIPUR **JUNE 2024 - Present**

Currently interning at MNIT Jaipur, working on an automation project for battery status checking. Responsible for automating the motion of DOBOT CR3 and MG400 robots, utilizing OpenCV for battery status detection through thermal imaging. Developed a GUI using Python PyQt6 and implemented various machine learning algorithms for enhanced automation. Integrated Arduino Uno for additional automation functions and established connectivity using Python. This project demonstrates my skills in robotics, computer vision, GUI development, and machine learning.

Member at SLIET ENDEAVOUR **FEBRUARY - NOVEMBER 2022**

As a member of the SLIET ENDEAVOR team, I was involved in the creation of numerous projects, including a Line Following Robot (LFR), RC plane, drone, Hydraulic Arm, and more. I gained extensive knowledge in various areas such as Arduino programming, machine learning, data analysis, data science, face recognition, object detection, and more. I was able to apply these skills practically in our projects. Our team participated in numerous competitions, consistently achieving high ranks due to our innovative work and strong team performance.

PROJECTS

News App Web Application | ReactJs, CSS, Bootstrap, API, MERN **DECEMBER 2023**

- Developed an engaging NEWS web app using React, fetching real-time news data from an API. The app covers 5+ categories, including sports, politics, and entertainment.
- Implemented a category selection feature, allowing users to explore in-depth news articles based on their interests.

Spotify Clone | HTML, CSS, JavaScript, Rest API, Bootstrap **AUGUST 2023**

- By meticulously crafting the design and ensuring seamless interactivity, I gained valuable hands-on experience in web development.
- My commitment to detail, problem-solving skills, and passion for software engineering drove the successful completion of this project.

Some Mini Projects **JANUARY 2023**

- **QR Code Generator**: Created QR codes using Python libraries. Encoded data into QR format for practical applications.
- **JARVIS AI Voice Assistant**: Crafted an AI voice assistant inspired by JARVIS. Leveraged Python libraries for speech recognition and automation.

- **Python Games**: Designed interactive games using Python. Enjoyed the process of game development.
- **DETECTION** : Object detection, face detection, hand detection
- **Sentiment Analysis Tool**: It uses natural language processing (NLP) to analyse sentiment from user reviews on social media. Library used- NLTK, TensorFlow(framework)
- **Face Recognition Tool**: Using OpenCV and Python that can identify and verify individuals from a video
- **AI Chatbot for Customer Service (Ongoing):** Designed an AI chatbot using Python and TensorFlow that handles customer inquiries and provides timely responses for a food ordering website.

Robotics Club Project: RC Plane | Collaborated With team ENDEAVOR **DECEMBER 2022**

- Leveraging my technical skills and benefiting from the collective expertise of my peers, we successfully built a functional aircraft. Our project involved aspects such as aerodynamics, electronics, and precision assembly.
- The RC plane not only demonstrated our engineering prowess but also provided valuable hands-on experience. Through effective teamwork and problem-solving, I contributed to the realization of this exciting project.

TECHNICAL SKILLS

- **Languages:** C/C++ , Python, MERN, Data Analysis, Machine Learning, SQL, Data Science, Data Structure and Algorithms
- **Database:** MySQL, Excel, MongoDB, GraphQL, AWS Cloud**,** Docker, DBMS
- **Data Analysis**: Python, SQL, PowerBI, Tableau
- **Machine learning:** NumPy, Pandas, Matplotlib, Scikitlib, Seaborn, OpenCV, TensorFlow, etc.
- **Development**: HTML, CSS, Boot-Strap, JavaScript, ReactJs, NextJs, Redux Toolkit, MERN, Tailwind CSS, PYQT6, Arduino
- **Developer Tools:** Visual Studio Code, Jupyter Notebook, Git, GitHub, Postman, AWS, Unix/Linux

Achievements / Certifications

Solved :

- 40**0+** problems on **Leetcode**
- **350+** problems on **GFG**
- 4**00+** problems on **Codechef** and **Codingninjas**

Certifications :

- **Machine learning** :
  - Supervised Machine Learning
  - Advanced Learning Algorithms
- **Data Analysis**
